

Aydin's Academy College Counseling

Ultimately, we want to help your child gain acceptance to universities that will create a path to your child's ultimate goals, while avoiding unnecessary stress. We want your child to love every minute of high school and college by giving them world-class opportunities to participate in. We do that with our 5 Pillars of Success: Academics, Competitions, Professional Experiences, Community Service, & a Personal Project.

- Academics require perfectly balanced classes both in and outside of school. Beyond AP classes are college courses and professional certifications.
- Extracurricular competitions. One of the biggest reasons students with perfect grades still get rejected is because their extracurriculars are too "cookie-cutter," and do not highlight the skills universities are looking for. Extracurricular activities need to be competitive and prestigious.
- All of our advising comes from relationships built with colleges and universities admissions teams for over a decade. Every piece of advice Aydin's Academy provides comes from trustworthy sources and has been verified by the university's performance.
- The easiest way to get into top 10 programs is still through niche athletics. Aydin's Academy provides counseling on which sports clubs/programs can ensure getting noticed by coaches of top universities.
- Universities now ask how students have pursued their interests outside of school. A personal project is now critical to demonstrate mastery and genuine interest in the subject.
- Regular Meetings are the key to success. Attending our Quarterly Check-Ins are an absolute must.
For our Intensive College Counseling Students, we meet biweekly for 30 minutes.
- Included SAT/ACT Prep for our Intensive Students. Recently Increased from an 80hr program to 105hr program.
- Newly included guidance through self-driven research publication. Top universities are research institutions, looking for excellent researchers.
- Aydin's Academy Summer Application Session ensures students complete college applications by their first day of Senior Year. Recently increased from 6hrs to 10hrs a week.
- Scholarship Program – 2 Hours a week to ensure even the most expensive education is as affordable or cheaper than a UC.
